OBJECTIVE

Computer Science Engineer seeking full-time Full Stack Developer role.

EDUCATION

2020:Secondary ,Ghoshpur High School, Class 10th%-69%
2022:Higher Secondary Class 12,Ghoshpur High School, Class 12th%-96%
2024:Bachelor of Computer Science, Chitkara University Baddi with 7.8 CGPA

SKILLS

Technical Skills: C, C++, Front-End Development, Node-JS, DBMS, Linux
Soft Skills: Adaptability, Quick Learner

EXPERIENCE

Completed CodSoft 4 weeks Internship Program on C++ Programming.	01/09/2023
Participated in 2 days Yamaha Explore AI 2.0 Hackathon	28/04/2023

PROJECTS

Smart Car Parking System (IOT). Developed IoT-based Smart Car Parking System project involving IR sensors to detect empty slots and display real-time availability on an LCD screen. Implemented to enhance parking management efficiency and user experience.

Demo Blog Website. Built a project that is used to share valuable content, ideas, expertise, or experiences with a specific audience, aiming to inform, entertain, inspire, or engage readers while building a community. It is built using Node-JS.

E-COMMERCE Website: Designed and developed an e-commerce website, implementing responsive design for seamless user experience across devices.

Automatic Street Lamp (IOT). Built a project to efficiently manage street lighting by automatically adjusting the brightness of street lamps based on environmental factor such as natural lights levels and human presence.

EXTRA-CURRICULAR ACTIVITIES

Participated in various open round coding competitions in various websites.
Participated in various Football tournaments
Participated in various Cricket tournaments
